**The debate about Gun Laws and School Violence**

I think we should have stricter gun laws in the United States. I believe you should not be able to buy a gun until you turn 21. I also believe you should have to get a background check, mental check, and a physical clearance to buy a gun. Then this law will start a protest because youth hunters use guns to kill animals. The government can argue that you can use a bow or a cross bow to hunt animals. You don't need a gun to kill animals. Again, I think the law should be that you couldn't get a gun until you turn 21 and have a clearance check. If the laws are not passed it will stay a dangerous situation for everyone. The laws should focus on preventing the sales of semi-auto guns that are used for mass killings. You can kill someone with a handgun with 1-3 bullets. You don't need a semi-automatic gun to defend yourself. Such laws will end the violence.
